

Sharing Field Data Files

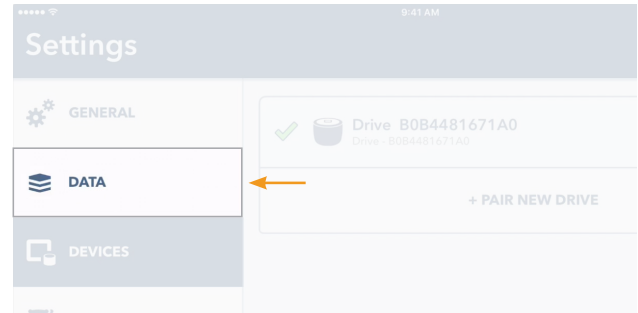

Sharing the field data files that Climate FieldView™ Cab collects during planting and harvest enables others in the operation and trusted advisors to collaborate using field data. FieldView™ Cab 5.14 makes this easy by adding the ability to share the field data from selected fields directly from the app.

1 Go to “Settings” from the homescreen.

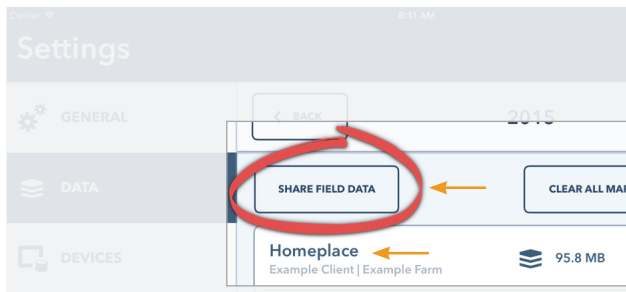

2 Tap on “Data” in the menu on the left.

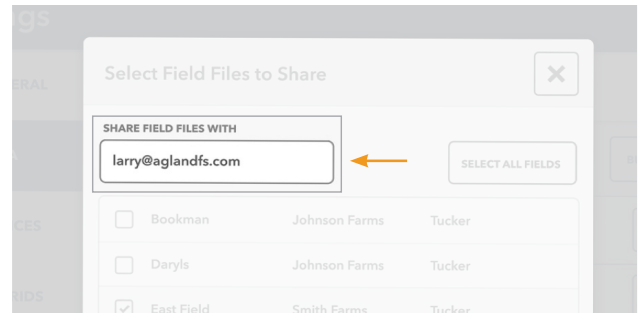

3 Select a season to share data from, and tap the Share Field Data button at the top of the page.

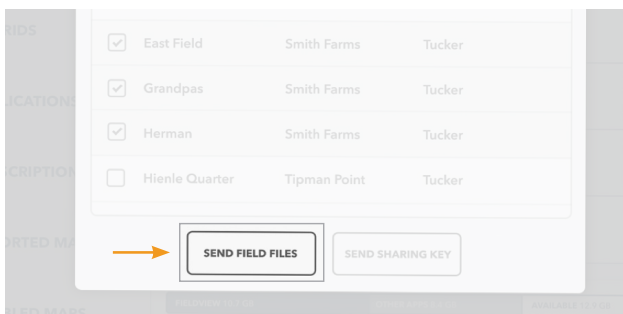

A window will appear where individual or all fields can be selected.

4 Enter the email address of the person who should receive the shared files.

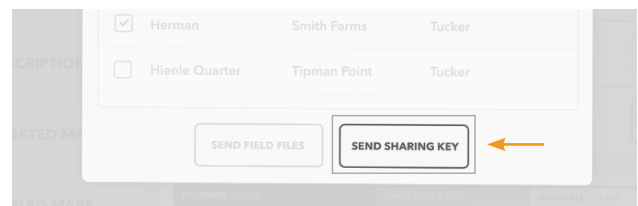

5a Tap “Send Field Files” to send an email with a link so the recipient can download field data files...

5b Or tap “Send Sharing Key” to send an email with a unique key.

The recipient can enter directly into compatible third party mapping software to automatically retrieve field data files. Learn more about compatible software systems with Climate FieldView™ partnerships at <https://climate.com/partnerships/>.

To view or revoke Sharing Keys: Visit <https://fieldviewplus.com>, go to Data > Data Manager > select “Sharing Key History” from the Action menu.
