

**Summary:** FieldView users can create Planting and Harvest Summaries on the Climate FieldView Cab App that include a Field Map. These summaries can then be either printed or emailed. FieldView 4.07 or greater is required for this feature

### Step #1: View a Planting or Harvest Summary

- Once data has been collected for a field (either planting or harvest) press the 'More' button located next to the 'Home' button on the Map screen.
- Select 'Planting Summary' if viewing planting data or 'Harvest Summary' if viewing harvest data.

### Step #2: Press 'Create Map PDF'

- Creating a Map PDF will generate a report that includes the information from the Planting/Harvest Summary as well as a Field Map.
- Planting Summary PDF's will always have a Hybrid Map
- Harvest Summary PDF's will always have a Yield Map

**Planting Summary**

GAME PRESERVE NO.15B  
Example Client | Example Farm  
Corn - Planted Apr 17, 2015

HYBRID	POPULATION	UNITS	ACRES
DKC60-67RIB	30,125	1.75	4.6
DKC64-87RIB	30,800	13.46	35.1
<b>Total/Avg</b>	<b>30,724</b>	<b>15.21</b>	<b>39.7</b>

**Planter Performance**

99.3% SINGULATION	99.2% GOOD SPACING	94.1% GOOD RIDE

### Step #3: Press Email/Print

- This will open the iPad's menu to email or print the PDF.  
Note\* To be able to print directly from the iPad, a compatible printer must be available.
